

COMMERCIAL VEHICLE SAFETY

SIDE CURTAIN AIRBAG

This airbag offers superior occupant protection in rollover accidents and collisions involving lateral impacts. Positioned in the roof-line between the side window and the occupant of a truck or bus, the inflatable curtain effectively softens head impacts and supports ejection mitigation. This significantly reduces the risk of life-threatening head injuries during collisions and rollover accidents.

Key features & benefits

- Quick deployment and inflation
- Proven technology
- Protection shape can be individually tuned by truck
- One-piece woven inflatable bag
- Reduces the effect of impact on occupant head following primary impact
- Reduces the likelihood of ejection through side windows in rollover crashes
- Can be coupled with pre-tension retractors

Inflatable Curtain
